Hazardous Weather Preparedness Plans

WHY YOU NEED ONE

HOW WE CAN WORK FOR
YOU

Severe weather can happen at any time, in any part of the country.

As a business owner, you have many responsibilities. One of the most important aspects of your job is being prepared for the inevitable. Creating a hazardous weather preparedness plan for your business is a proactive way to ensure you are fully prepared for the worst, and in doing so you will:

- Increase the safety of your employees and tenants
- Decrease your risk of litigation
- Minimize disruption to your business operations when severe weather strikes
- Reduce insurance claims made as a result of injuries due to hazardous weather

Types of Severe Weather:

- Freezing rain, sleet, snow, ice, and strong winds associated with winter storms
- Damaging winds, tornadoes, lightning, large hail, flooding, and flash flooding typically associated with thunderstorms
- Extreme heat and cold
